| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). |   |   |                        |  |  |  |

## Claim Objections

Claim 56 is objected to because of the following informalities: on line 6, the term "articulates" is confusing since the condyle portion is not positively claimed and not encompassed by the preamble. The Examiner suggests changing the term "articulates" to ---adapted to articulate--- in order to overcome this objection. Appropriate correction is required.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 56, 58-69, and 71-75 are rejected under 35 U.S.C. 102(b) as being anticipated by Martinez et al (US 4,994,757). Martinez anticipates the claim language where:

- the tibial insert as claimed is the prosthesis of Martinez (see the abstract,
   Figure 1 and column 2, lines 18-65);
- the articular component as claimed is the tibial insert (11);
- the tibial plate as claimed is the base plate (15);
- the tibial post as claimed is the stem (23) and/or bolt (17) and/or stem
   (41) and
- the tibial augment as claimed is the plate (13).

Regarding claims 58 and 59, the medial and lateral widths can be taken at any point so the thickness through the edge of the plate is less than at the central part of the plate to the edge inner boundary.

Regarding claim 60, the proximal end and distal end can be the left side to the right side in Figure 1.

Regarding claim 67, the Applicant is directed to column 1, lines 44-46 and the abstract.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 70 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martinez et al (US 4,994,757) in view of Pappas (US 5,683,467). Martinez meets the claim language but fails to teach the augment taper as claimed. However, Pappas teaches that it was known to taper the edges of similar plates; see Figure 8 and column 4, lines 35-55. Therefore, it is the Examiner's position that it would have been obvious to taper the edge of the Martinez plate (13) for the same reasons that Pappas does the same.

Claim 57 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martinez et al (US 4,994,757) in view of Johnson et al (US 6,136,029). Martinez meets the claim language as explained in the Section 102 rejection *supra* but fails to disclose the utilization of porous tantalum as the implant material. However, Johnson teaches that it

was known to use porous tantalum in the art; see column 4, lines 42-58. Therefore, it is the Examiner's position that it would have been obvious to utilize porous tantalum as the implant material in Martinez for the same reasons that Johnson utilizes the same.

#### Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 of 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Application/Control Number: 10/780,378

Art Unit: 3774

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Paul B. Prebilic whose telephone number is (571) 272-4758. He can normally be reached on 6:30-5:00 M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Isabella can be reached on 571-272-4749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
